OF. and AF. *tempte-r* (12–14th c.), learned form, beside the popular form *tenter, tanter*:—L. *temptāre, tentāre* to handle, touch, feel, try the strength of, put to the test, try, attempt: cf. Pr. *temptar*, Cat., Sp., Pg. *tentar*, It. *tentare*. The Eng. form has always followed L. *tem(p)tare*, the form *tent* being very rare (see TENT *v.*2); but the sb. *temptation* had from 13th c. the collateral form *tentation*, which during the 16th and 17th c. was much used by theological writers.

In inscriptions and early MSS., the Latin vb. is always *tempt-* or *temtāre*; this became in due course *tentāre* in Romanic (see above, and cf. *promptus, pronto*, etc.); about the 13th c. scribes began to introduce this spelling in Latin MSS., whence it came into printed books and Latin Dicts., being supported by an assumed etymology as freq. of *tendĕre, tentum* to stretch, strive, aim, endeavour, try (meeting at length with sense 3 below); but this is now rejected in favour of a root *tem-, temp-*: see Walde *Lat. Etym. Wörterbuch* s. v. *tempto*.

The inflected form, a plural *i*-stem (:—*texanī*²), in OE. *tíene*, etc. (neut. *-u*, *-o*, gen. *-a*, dat. *-um*), ME. *tēne*, was used when the numeral stood absolutely (sense 2); the uninflected was used with a sb., and at length, in ME., in all positions. (But see *-TEEN*, from *-tēne*.)]

The cardinal numeral next higher than nine; the number of the digits on both hands or feet, and hence the basis of the ordinary or decimal numeration.

Expressed by the figures 10, or symbol X, x.

Aberd.* Jan. in *Chas. Hosp. Hernar* (1864) 24 Sept., Quhilk[is] proprietie and tenandrie, pertenand.

c. A set of houses owned by tenants collectively.

1905 *Westm. Gaz.* 23 Aug. 8/3 It is here sought to prove as a sound economical principle..the collective ownership of a house with individual responsibility. No one tenant owns any distinct house in any 'tenantry', but the profits that accrue from that particular 'tenantry', after the deduction of interest on the money, cost of repairs, &c., are shared amongst the tenants.

3. *spec.* That part of a manor or estate under common or open-field husbandry (Tusser's 'champion countrie', *Husb.* lxiii.) occupied by tenants, as distinct from the lord's demesne (as in Domesday Survey, 'terra *in dominio*' and 'terra *in villenagio*'). Hence, locally applied to the condition or system of tenancy under open-field husbandry. See also *tenantry acre*, *field*, *flock*, *land*, in 5.

1794 T. DAVIS *Agric. Wilts.* 14 The abolition of common-field husbandry (or as it is called in Wiltshire 'Tenantry'). *Ibid.*, Modern improvements..cannot be adopted to any extent, in lands lying in a state of tenantry. *Ibid.*, Tenantry yard-lands (or customary tenements)..are still subject to the rights of common. **1844** LITTLE in *Jrnl. R. Agric. Soc. Eng.* V. I. 178 Most of these commons are now enclosed;..some still remain in pasture, and the common field husbandry, or 'tenantry', as it is called, is abolished.

4. The body of tenants on an estate or estates. (Now the most usual sense.)

5. *attrib.* and *Comb.*, as, in sense 3, *tenantry acre*, *down*, *field*, *flock*, *land*, *road*; **tenantry dinner, a dinner given to the tenants on an estate.**

1794 T. DAVIS *Agric. Wilts.* 61 In the common fields..the usual rule is, to allow one thousand sheep to fold what they call a *tenantry acre (about three-fourths of a statute acre) per night. **1903** *Westm. Gaz.* 9 Jan. 7/2 The *tenantry dinner. **1794** T. DAVIS *Agric. Wilts.* 58 The old custom of the *tenantry fields of Wiltshire was..to give a year's fallow previous to wheat. **1813** *Ibid.* Gloss., *Tenantry Fields and Downs*, fields and downs in a state of commonage on the ancient feudal system of copyhold tenancy. **1793** A. YOUNG *Agric. Sussex* 69 A *tenantry flock [of sheep] (the joint

property of several people) belonging to the parish of Denton. 1853 W. D. Cooper *Sussex Gloss.* 65 *note*, The proportion between the tenantry and the statute acre is very uncertain. The *tenantry land was divided first into laines, of several acres in extent, with good roads..between them; at right angles with these were formed..*tenantry roads,..dividing the laines into furlongs.

[*Note.* With *tendril*, cf. F. *tendrillon* bud, tender sprout or shoot, dim. of *tendron* in same sense, also fig. a 'bud', a young girl; also cartilage; which Hatz.-Darm. refer to *tendre* adj. tender. But Paré (16th c.) took *tendron* as synonymous with *capréole* tendril, clasper ('La vigne par ses tendrons ou capréoles tortues embrasse toutes choses'), and L. *capreolus* (rendered by Elyot 1538 'tendrell') was by R. Estienne, 1536, glossed by *tendon*, a deriv. of L. *tendĕre*, F. *tendre* to stretch. There was thus in 16th c. F. some confusion between *tendon* and *tendron*, which appears to have influenced the Eng. use of *tendril* and associated it with *tendre* to stretch rather than with *tendre* tender. b. In Scotland, more particularly applied to a large house i. e. edifice under one roof constructed or adapted to be let in portions to a number of tenants, each portion so separately occupied being considered and called a 'house'. Called also *tenement of houses*, *land of houses* (= *tenement house* in 5).

Thus a 'house' in England may form one 'tenement', or contain a number of 'tenements' (and is then a 'tenement house': see 5); in Scotland, a 'tenement' may form one 'house', or contain a number of 'houses' or dwellings.

1. A game in which a ball is struck with a racket and driven to and fro by two players in an enclosed oblong court, specially constructed for the purpose, and (in the developed form of the game) having an enclosed corridor on one of the long sides roofed over by a penthouse.

The game had originally a much simpler form, the ball being struck with the palm of the hand (hence F. *la paume*). It was also played in the open air, as still in some places in France, and down to about 1800 in England under the name *field-tennis*, of which *lawn-tennis* (sense 2) may be considered a greatly modified revival.

2. Short for Lawn-tennis (q. v.), a game played with a ball and rackets on an unenclosed rectangular space on a smooth grass lawn or a floor of hard gravel, cement, asphalt, etc., called a court.

Introduced about 1874 (see Lawn-tennis); reduced to its present form in 1877.

[*Note.* The introduction of some form of tennis into Florence by the French knights in 1325, and the use of the name *tenes*, appear not to be recorded elsewhere than in Velluti's *Cronica*, nor does either game or name appear to have been long retained; the name was manifestly foreign, and opposed to Italian word-formation. But its use in Florence at least 30 and perhaps 70 years before the earliest known English example, implies either that the Eng. name came from Italy, or that both had a common source. The latter is the more likely; it was French knights who introduced the game at Florence, and the Eng. *tene·tis*, *teney·s*, with their final stress, imply French origin. The difficulty is that the game has app. never borne any such name in Fr., where, from 1350 or earlier, it has been called *la paulme*, *la paume*. The only Fr. word akin in form is *tenes* (AF. *tenetz*), 2 pers. pl. pres. indic. and imper. of *tenir* 'to hold', also 'to take, receive what is offered'. Hence the suggestion made by Minsheu 1617, and favoured by Skeat, Jusserand, and others, that the name originated in the Fr. imperative *tenez* 'take, receive', called by the server to his opponent. There is of course the difficulty that no mention of this call has yet been found in French, where it must have been used if thence taken into It. and Eng. But in the Colloquies of Cordier and Erasmus, the server's call is latinized as *accipe* and *excipe*, and in the *Carmen de ludo pilæ reticulo* of R. Fressart, Paris, 1641, 'excipe', 'pilam excipe', 'mitto pilam in tectum, excipe', with other uses of *excipere* and *accipere*, occur eight times in the portion printed by Julian Marshall *Annals of Tennis* 27–29. These Latin words witness to the use of *tenez* or some equivalent call in French, and favour the conclusion that this call gave rise to the 14th c. It. and Eng. name.]

5. High tension: a high degree of tension (of any kind); **a.** *esp.* in *Electr.* a term for a high degree of electromotive force or difference of potential: now chiefly used by makers of motor-cars, and of magnetic and induction coils. So **Low tension.** (See sense 4.) Chiefly *attrib.* as in *high* or *low tension system* (of electric lighting, etc.); also *h. t.* or *l. t. charge, contact, current, fuse*, etc.

1889 *Daily News* 7 Oct. 3/1 Mr. Crompton does not say that the high tension system will not succeed. He says both will succeed; but that the low tension system is safer and cheaper. 1891 *Cent. Dict.* s.v. *Tension*, A body is said to have a high-tension charge, or a charge of high-tension electricity, and a conductor to carry a high-tension current, when the stress in the medium surrounding the body or the conductor is high. 1900 *Engineering Mag.* XIX. 715 When required for high-tension fuses, the armature of this exploder is wound with very fine wire; when for low-tension, with coarse wire. 1903 *Motor. Ann.* 221 The low tension system is one which will undoubtedly come to the fore. In this the actual current from the battery, or magneto machine, is interrupted inside the cylinder, thus causing a spark. 1906 *Westm. Gaz.* 13 Nov. 4/2 High-tension magneto, it is noted, is gaining in popularity—the low-tension system being confined almost exclusively to the very high-priced cars. 1907 *Ibid.* 5 Dec. 4/2 The low-tension make and break is made on platinum points by means of a cam, whilst the high-tension contact is made through metal contacts by a revolving carbon brush.

b. Of the pulse: cf. TENSE *a.* 1 (quot. 1802).

The rare form *tenture* is equated by Promp. Parv. with L. *tentūra*, but this ought to mean the process of stretching or its product: cf. F. *tenture* action of stretching, also tapestry hangings; which does not agree with the sense of 'stretching instrument or apparatus'. On the other hand, if the word were merely an Eng. agent-n. from Tent *v.*[3], it would be difficult to account for the various forms of the ending. The forms in *teynt-, taynt-, teint., taint-* also offer difficulty, suggesting some association with F. *teint* dye.]

the tenth-rate kind. 1905 *Westm. Gaz.* 28 Mar. 4/1 Constable is too remote and difficult, but a *tenth-remove derivative, properly browned, will serve their turn.

[*Note.* The etymological history of some of the prec. forms (as in other numerals) presents points of which the explanations are more or less conjectural. The direct OTeut. repr. of Indo-Eur. **dekmto's* was by Verner's Law **tegundos*; with this the Gothic *taihunda*, OS. *tehando*, OHG. *zehanto*, agree, except in having *h* for *g*, apparently under the influence of the cardinal **tehwi, -an*. The OTeut. **tegunþo-*, whence OS. and OFris. *tegotho, -a*, OAnglian *te(o)goþa*, implies a pre-Teut. **dekm'tos*, with shifted stress (implied also in some other ordinals). Assimilation of this form also to the cardinal would give **tehunþo-*, whence **tehūþa, teoh(o)ða, téoða*. The history of *tende* is more uncertain: the four ordinals, *sefende, eȝtende, neȝende, tende*, in ME., Northern and Kentish, form a group of which only the first is known in OE., repr. by *siofunda, seofonda*, in the Lindisf. and Rushw. glosses. *Siofunda*, like Goth. **sibunda*, OS. *sibundo*, OHG. *sibunto*, represents an OTeut. **sibundo-*, Indo-Eur. *sep(t)mto's*. OE. *nigenda* (*a* 1066), OS. *nigundo*, OHG. *niunto*, Goth. *niunda*, had prob. a parallel history. The ME. *ehtende* appears to have been conformed in its ending to *sefende*; and *tende*, from its late appearance, was prob. formed from *tēn* on the same model. *Ten-th* has the suffix which in OE. appears in *feorða, seofoða, eahtoða, nigoða, teogeða*, and which has now been extended to all the ordinals from *fourth* onward. On the other hand, *ten-t* has the form of the suffix which was regular in OE. *fifta* (OS. and OFris. *fifto, -ta*, OHG. *finfto*, Goth. *fimfta*, OTeut. **fimfto-*), and *sixta* (OS. and OHG. *sehsto*, Goth. *saihsta*, OTeut. *seχsto-*), which in OE. was also used in *enlefta* (*ellefta*) and *twelfta*, and in North. and North-Midld. dialects has since been extended to all the ordinals from *fourt* to *hundert*.]

6. *Law.* An estate or interest in land, etc. for a certain period; in full, *term of* or *for years.*

Outstanding term, Satisfied term: An estate for a long term of years was given, usually to the trustees of a strict settlement, to secure to beneficiaries under the settlement the payments due to them periodically from the tenant of the settled land. If these payments were not made, the trustees could take possession of the land for the term, and sell or mortgage it, to raise the money needed to make them. When the purposes for which the estate was created were fulfilled (e.g. by the death of all the beneficiaries) it was called a *satisfied term*; but unless express provision had been made that it should then cease, or unless it was conveyed to the tenant of the freehold so that it was destroyed by merger in the freehold, it continued to exist for the period for which it was created. It was then known as an *outstanding term*, or an *attendant term*, i.e. a term accompanying the inheritance. By Act 8 & 9 Vict. c. 112 provision was made for the cessation of satisfied terms.

[*Note* to branch IV. Gr. ὅρος denoted 'boundary mark' and thence 'a boundary', as in Euclid (see 1570 in sense 1). Hence in Arithmetic, applied to each of the terms in a ratio, e. g. 2 : 4 ; also in a proportion, and in any related series of numbers; in the statement of a mean between two numbers, as 6 : 9 : : 12, 6 and 12 were the ἄκροι ὅροι 'extreme terms', and, by extension 9 was called *μέσος ὅρος* 'the mean term'. In Logic, ὅρος was applied to the terms in an analogy, e. g. 'as A is to B, so is C to D', where A, B, C, and D were ὅροι; also to the terms (subject and predicate) in a proposition; hence to the terms in a syllogism, the major, minor, and middle (the last being analogous to the 'mean term' in Arithmetic). By late Latin philosophical writers, ὅρος in the geometrical, arithmetical, and logical senses was rendered by *terminus* (constantly used by Boethius *a* 524). The application of ὅρος and *terminus* to the definition or limitation of a word appears in Petrus Hispanus, and led finally to the application of *terminus* to any word used in a definite or limited sense (as in sense 13 above). In Aquinas (13th c.) *terminus* is synonymous with *dictio*, *locutio*, *nomen* (see the Thomas Lexicon s. v.).]

Terpene (tɜ·rpin). *Chem.* [f. *terp-* in *terp-entin*, obs. f. TURPENTINE, with suffix -ENE, used in forming the names of hydrocarbons related to BENZENE. The commonest is PINENE, the chief constituent of turpentine-oil.

Sometimes used to include hydrocarbons of formula C_5H_8, and its polymers $C_{10}H_{16}$, $C_{15}H_{24}$, $C_{20}H_{32}$, etc.

II. In Christian Latin use of *testāmentum*.

Orig. a misuse of the word, arising from the fact that Gr. διαθήκη, 'disposition, arrangement', was applied both to a covenant (*pactum*, *fœdus*) between parties, and to a testament or will (*testamentum*). Prob. largely due to the use of διαθήκη (in the sense 'covenant') in the account of the Last Supper immediately before Christ's death, and its consequent association with the notion of a last will or testament. See also historical note s. v. COVENANT *sb.* 7.

5. Hence, through the application of παλαιὰ and καινὴ διαθήκη, in the Itala and Vulgate *vetus* and *novum testamentum*, to the Mosaic and Christian 'covenants' or 'dispensations' (cf. 2 Cor. iii. 6, 14 cited in 4), the term passed in early Christian Latin (and thence in the languages of the West) to the books or records of the old and new covenants.

(This transition of sense took place many centuries before the adoption of the word in English, where the name was simply taken over from L. or Fr. in this transferred use.)

Tethinge (s, var. *tithing(s*, TIDING(S.

†Tethy, *a. Obs. rare.* Also 5 **tithy, thethy.** Of uncertain origin and meaning.

The sense of TEETHY *a.*[1] seems unsuitable. Can it be a corruption, or rather a series of errors, for TIDY *a.*, which occurs in this poem (and elsewhere) as an epithet of approval or praise, = good, excellent, worthy, apt, brave, doughty? But such an alteration of vowel and consonant in *tidy* is unknown elsewhere, and is phonetically unwarranted.

Their first seat was at Acre; after the fall of the Latin kingdom of Jerusalem, they settled at Marienburg on the Vistula, and carried on a crusade against the neighbouring heathen nations of Prussia, Livonia, etc. Their conquests made them a great sovereign power, but from the 15th c. they rapidly declined, and were abolished in 1809. The order maintains a titular existence in Austria and Holland.

[*Note.* Late Roman writers reckoned the *Teutones* among the peoples of Germania, and *Teutonicus* became a common poetic equivalent for *Germānicus.* It is now however held by many that they were not a Germanic people. But, before 900, German writers in Latin began to follow Latin poetic precedent by using *Theutonica lingua* instead of the barbarian or non-classical *Theotisca,* to render the native *tiutisch, tiutsch* (OHG. *dutisc,* mod. *deutsch*—OS. *thiudisc,* OE. *þēodisc,* literally 'national, popular, vulgar') as a designation of their vulgar tongue in contrast to Latin, as if this German adj. were identical with the ancient ethnic name. In 1200 *lingua Teutonica* was similarly used, and thenceforth *Teutonicus* became a usual L. rendering of *Deutsch* or *German.* Some Early German comparative philologists (e. g. Bopp in 1820) used *Teutonisch* as the name for the family of languages including Gothic, German, Scandinavian, and English; but for this *Germanisch* is now more used in German, and *Germanic* by many in English. But in English there is an awkwardness and sometimes ambiguity in using *Germanic* beside *German* (in its ordinary political sense), which does not arise in German or French, where *germanisch* and *germanique* are entirely distinct from *deutsch* and *allemand.* To avoid this, many English scholars prefer 'Teutonic' as the term for the linguistic family, and it is commonly so used in this dictionary.]

Teutonically (tiutɒ·nikăli), *adv.* [f. prec.: see -ICALLY.] In the manner of a 'Teuton' or German; in German style.

TH, in words of Old English or Old Norse origin, and in words from Greek, is a consonantal digraph representing a simple sound, or rather (in Teutonic words), a pair of simple sounds, *breath* and *voice*, indicated in this dictionary by the OE. letters (þ) and (ð); the former, as in *thin, bath* (þin, baþ), being the breath dental spirant akin to *t*, and the latter, as in *then, bathe* (ðen, baðe), the voiced dental spirant akin to *d*. The group t, d, þ, ð, corresponds to the group p, b, f, v. The breath spirant is identical with modern Greek *theta* (Θ, θ), and approximately with Spanish *z* (or *c* before *e, i*). The Greek letter, which corresponds etymologically to Sanskrit ध *dh* (and so, by Grimm's Law, to Teutonic and English D), was in early inscriptions represented by TH, and was a true aspirate; it was subsequently often written TΘ, *τθ*, and had prob. the sound (tþ); but by the second century B.C. it had sunk into a simple sound, = our (þ). The Romans, having neither the sound nor the symbol, represented the letter by TH, as in *Θάψος, Thapsus*, but app. this was pronounced, at least in late Latin (whence in all the Romanic languages), as simple *t*; cf. Greek *θεωρία*, L. *theōria*, It. and Sp. *teoria*; in Pg. *theoria*, F. *théorie*, spelt with *th*, pronounced with *t*; also Gr. *Θωμᾶς*, L. *Thōmās*, It. *Toma*, Sp. *Tomás*; Pg., F., Eng. *Thomas* all pronounced with T.

(2) In Teutonic the breath spirant (þ) was very frequent, being the regular etymological representative of Indo-Eur. *t* initially or after the stressed vowel, as in OTeut. **þrijiz*, Goth. *þreis*, OE. *þreo*, Eng. *three*, = Indo-Eur. **treies*, Skr. *trayas*, Gr. *τρεῖς*, L. *trēs*; OTeut. **brôþer*, Goth. *brôþar*, OE. *brōþor, brōðor*, Eng. *brother*, = Indo-Eur. *bhrā·tēr*, Gr. *φρᾱ́τηρ* clansman, L. *frā·ter*. The voiced spirant in *brōðor*, etc., was a later development (*c* 700 in English) from the breath sound between vowels or voiced consonants, as in the parallel *v* and *z* from *f* and *s*. Initially, the same change of (þ) to (ð) took place during the Middle English period in the demonstrative group of words, *the, that*, and their kindred, *this, these*, †*tho, those, there, then, than, thence, thither, thus*, etc., and in the pronouns of the second person singular, *thou, thee, thine, thy*: these constitute the only words in English with initial (ð). In the same group of words in the cognate Teutonic languages (þ) has passed through (ð into (d); thus Ger. *das*, Du. *dat*, Da., Sw. *det* 'that'; in High Ger., Low Ger., and Du. the same has taken place even in other original *th* words which retain (þ) in English; e. g. Ger. *dach, denken, ding, dick, donner, drei* = Eng. thatch, think, thing, thick, thunder, three.

(3) In the demonstrative and pronominal groups of words, change of initial *þ* to *t*, by assimilation to a preceding dental (*t, d, s*), appears in earlier English. OE. *þæt þe* became *þæt-te, þætte*; *þe læs þe* appears in the 11th c. as *þe læste*, whence modern *lest*. In the last section of the OE. Chronicle, from 1132, *þe* after *t* or *d* regularly becomes *te* (e. g. þat *te* king, and *te* eorles). In the Ormulum and the Cotton MS. of Cursor Mundi, this assimilation is seen in all the words of the *the-thou* group (*Orm.* þatt *tatt te* goddspell meneþþ, wrohht *tiss* boc, and *tatt te* follc all þess *te* bett; *Cursor*, ne was *tar*, here and *tare*, scho serued *tam*, als sais *te* sau). So in Ancren Riwle (and *tet* is, et *tesse* uerse, þeo þet *tus* doð, and *tes* oðer, etc.). In the course of the 14th c., this assimilation was given up, and the spirant reappeared (as ð).

(4) In the Runic alphabet (*futhorc*) the breath spirant had to itself a symbol Þ or þ (called *thorn*); but in the earliest known OE. writings in the Roman alphabet this was represented by *th*, the voiced spirant being often represented by *d* (ð) (sometimes by *th*). Before 700 probably, the character ð, formed by a bar across the stem of ð, was introduced; it appears in a charter of Wihtræd, king of Kent, 700–715 (Sweet *Oldest English Texts* 428). Apparently it was first used to denote the voiced spirant: see the proper names in the Moore MS. of Bæda, *c* 737, and the *Liber Vitæ*, Cott. MS., *c* 800, and charters before 800 generally. But in the ninth century it was used for both spirants, as in the Vespasian Psalter, *c* 825 (e. g. iv. 5 ða ðe cweoðað), and in a West Saxon charter of 847 (*O. E. T.* 433). Somewhere about 800 apparently, the thorn, þ, was adopted from the Runic futhorc, the earliest charter showing it being one of Coenwulf, king of Mercia, of 811 (O. E. T. 456); but it was not much used till late in the 9th c. A Surrey charter *a* 889 (ibid. 451) has 34 examples of ð initial, and 25 medial or final, with 49 of þ initial, and 1 medial. From the later years of the 9th c. ð and þ were used promiscuously in West Saxon works, with some preponderance of þ initially and ð finally. This continued in ME. till the 13th c. On the other hand, the Durham *Rituale* and the Lindisfarne Gospel Gloss, *c* 950, have uniformly ð in all positions (except in the compendium þ for *ðæt*), as has also the East Anglian *Genesis & Exodus*, *c* 1250; while the Mercian portion of the Rushworth Gospel Gloss, *c* 975, and Ormin, *c* 1200, have only þ. After 1250 the ð speedily became obsolete; þ remained in use, but was gradually restricted more or less to the pronominal and demonstrative words. In later times its MS. form approached, and at times became identical with, that of *y* (the latter being sometimes distinguished by having a dot placed over it). As the continental type used by Caxton had no þ, its place in print was usually supplied by *th* for both sounds and in all positions. But in Scotland, the early printers, especially in the demonstrative and pronominal words, continued the þ as *y*, as in *ye*, *yis, yat, you* (= thou), a practice also common in England in MS., and hardly yet extinct. Confusion with the modern *y* consonant, ME. ȝ, was avoided in Scotland, sometimes by writing the latter *yh*, but usually by continuing ME. ȝ in the form ȝ or z, so that *ye zeir* stood for *þe ȝeir*, i. e. *the year*. It is remarkable that, when OE. þ and ð were both in use, no attempt was made to differentiate them as breath and voice spirants, and app. no serious attempt even to distinguish them as initial and medio-final, as was done in Norwegian when the Roman alphabet was adopted, *c* 1200, and in Icelandic before 1300. At an earlier date (prob. *c* 800) the character ð was partially adopted from OE. in Old Saxon, and was used generally in the middle and end of words, while *th* was usual as the breath spirant initially.

(5) In a few compounds, as *anthill, outhouse, lighthouse, Chatham, Wythan, Tetholm*, etc., *t* and *h* come together but do not form a digraph; and in a few foreign words, chiefly East Indian, as *Thakoor, Thug*, *th* represents Skr. ठ *ṭh* or ड *ḍh*, the sound being a *t* or *t* followed by a slight aspiration (tʰ, tˢ), in Eng. commonly reduced to *t*.

In a few proper names and other words derived from or influenced by French, as *Thomas, Thompson, thyme*, *th* is pronounced as *t*; several other words were formerly so treated, and even spelt with *t*, e. g. *theatre, theme, theology, throne, authentic, orthography*: *t* has become fixed in *treacle, treasure*. The late L. and Romanic treatment of *th* as *t* often led to the spelling *th* where *t* was etymological, as in *Thames, Sathan*; in *amaranth, amanthus, anthor*, etc., the corruption has also affected the pronunciation. See the individual words. In some ME. MSS. *th* frequently appears for *t* or for *d*: e. g. *tho* to, *thyll* till, *myghth* might, *nyghth* night, *whythe* white; *theste* deed, *theer* deer, *thegree* degree, *thepor tyth* departed, *tho* do, *thogh* doth, *the the* abode, *grounded* grounded, *ichedeth* y-clothed, *lowthe* loud, *rythe* rood, *uather* under. Early ME. scribes (prob. Northern) often confounded the English letters þ (or ð) and ȝ, writing e. g. *ȝefinge* for *þefinge*, thieving, *ȝeiȝ, ȝeoȝ, ȝeiȝ* for *þeiȝ, þeoȝ, þreiȝ* (in Auchinleck MS. of *Horne and Rh.*).

(6) Etymologically, modern Eng. *th* (ð) often represents an OE. *d*, esp. before *r* or *er*, as in *father, mother, gather, hither, together*, etc.; dialectally, this sometimes extends to other words, as *bladder, ladder solder*; on the other hand some dialects retain original *d*, and extend it to other words, as *brother, further, rather, southern-wood, wether*. In *burden* and *murder*, *d* represents the earlier ð of *burthen, murther*.

Dialectally *th* is sometimes substituted for *f*, and vice versa: e. g. *thane, thetch, thistelow, thrail, thrae, throm, thurrow*, for *fane, fetch* (vetch), *fistula, frail* (hail), *frae, from, furrow*; also *fill, Furisday*, for Thill, Thursday. The Welsh name *Llewelyn* appears in Eng. as *Thlewelyn* (*Rolls of Parl.* I. 463 a, Edw. I or II), and *Llewellen* (Shaks. Hen. V). *Th* also occurs dialectally for *wh*, as in *thirl, thortleberry, thorl*, for *whirl, whortleberry, whorl*. Conversely, Sc. has *whaing, whang, white, whittle*, for *thwaing, thwang, thwite, thwittle*.

-th, *suffix* [1], a formative of sbs. **a.** from verbs; in some words, as *bath, birth, death, math, oath*, OTeut., repr. various Indo-Eur. suffixes, as *-tos, -tā, -tis, -tus*, in which the *t* following the stressed syllable regularly became *þ* in Teutonic; in others, as *growth, tilth*, going back to ON. or OE.; in others, as *blowth, spilth, stealth*, of later analogical formation. In many words Indo-Eur. *t* remained in consequence of its position, or *þ* was subsequently changed to *t*: see **-T** *suffix* 3 a.

b. from adjs. (rarely sbs.), representing Indo-Eur. *-itā*, OTeut. *-iþô*, Goth. *-iþa*, OE. *-þu, -þo, -þ*, with prec. *i-* umlaut, forming abstract nouns of state: as *filth* (OE. *fýlþ*, ON. *fúlindi* from *fúl* foul), *health, length, mirth, strength, truth*; in ME. and also in cognate langs., *dearth, depth*; of later analogical formation, *breadth, sloth* (cf. OE. *slǽwþ*), *wealth*. In some words of this group, *þ* has, by phonetic causes, become *t*, e. g. OE. *hiehþu*, ME. *heiȝþe*, now *height*, ON. *hæð*, ME. *sleiþe*, now *sleight*: see **-T** *suffix* 3 b.

-th, *suffix* [2], forming ordinal numbers; in modern literary Eng. used with all simple numbers from *fourth* onward; representing OE. *-þa, -þe*, or *-oða, -oðe*, used with all ordinals except *fifta, sixta, ellefta, twelfta*, which had the ending *-ta, -te*; in Sc., north. Eng., and many midland dialects the latter, in form *-t*, is used with all simple numerals after *third* (*fourt, fift, sixt, sevent, tent, hundert*, etc.). In Kentish and O.Northumbrian those from *seventh* to *tenth* had formerly the ending *-da, -de*. All these variations, *-th, -t, -d*, represent an original Indo-Eur. *-tos* (cf. Gr. *πέμπ-τος*, L. *quin-tus*), understood to be identical with one of the suffixes of the superlative degree. In OE. *fifta, sixta*, the original *t* was retained, being protected by the preceding consonant; the *-þa* and *-da* were due to the position of the stress accent, according to Verner's Law.

The ordinals from *twentieth* to *ninetieth* have *-eth*, OE. *-oða, -oðe*. In compound numerals *-th* is added only to the last, as 1343, the *one thousand three hundred and forty-fifth* part; in his *one-and-twentieth* year.

b. Phrase. *To set the Thames on fire* († *set fire to the Thames*, † *burn the Thames*), to do something marvellous, to work wonders. Usually with negative = to work no wonders, never to distinguish oneself.

Its employment as the connective particle after a comparative (= L. *quam*, F. *que*) is a pre-English development, existing already in WGer.: cf. OHG. *thanne, danne*, MHG. *danne, denne*, Ger. *denn* (now largely supplanted by *als*), OS. *than*, MDu. *danne, dan*, Du. *dan*, all used after the comparative. (Not so in Gothic or Scandinavian.)

How the conjunctive use arose out of the adv. of time is obscure. Some would explain it directly from the demonstrative sense 'then', taking 'John is more skilful than his brother' as = 'John is more skilful; then (= after that) his brother'. Others derive it from the relative or conjunctive use of OE. *þonne* (THEN 6), = 'When, when as', thus 'When as (whereas) his brother is skilful, John is more (so)'. The analogy of L. *quam* favours a relative sense.

When interrogative or demonstrative words became conjunctive or relative they lost their stress and were liable to weakening. Already in the 8th c. OE. *þanne* appears as *ðan, þan, than*, a form exemplified in nearly every century since, though down to *c* 1500 the fuller contemporary forms of the demonstrative adv., *þanne, þenne, þane, þene*, etc., were also in use. When the adv. was reduced to *þen*, from the 15th c. spelt *then*, there was a strong tendency to spell the conjunction in the same way, which during the 16th c. nearly triumphed; but in the 17th c. the tide turned, and by 1700 or a little later the conjunction was differentiated from the adv. as *than*. As the latter was, and is, pronounced (ðən), it is manifest that it might be written either *then* (ðĕn) or *than* (ðăn) with equal approximation to the actual sound.]

1. The conjunctive particle used after a comparative adjective or adverb (and sometimes after other words: see 2-4) to introduce the second member of the comparison; the conjunction expressing the comparative of inequality (cf. AS 3). In use it is always stressless, usually joined accentually to the prec. word, e. g. *more than, less than, other than* (mō·ˑrðən, le·sðən, ˇvˑðəɪðən).

The two members of the comparison are most commonly of the same grammatical form, e. g. two clauses (the latter of which may be contracted in various ways), two substantives, two pronouns, two infinitives, two adjectives, two adverbs, etc., but not invariably so: see the quots. (Two infinitives connected by *than* in mod. Eng. either both have *to* or are both without it; formerly (until *c* 1800), esp. after *had rather*, *had better*, the second infinitive often had *to* when the first was without it.)

Instead of *than* after a comparative, *as* (like Ger. *als*) is common in Scotland, the north of England, and in parts of Ireland and the United States; *nor* (*nar*, *ner*) appears to be dialectal everywhere from Shetland to Hampshire and Cornwall, as well as in Ireland and America (see E.D.D.), but seems never to have been literary except in Sc., where also *na* was formerly used. In Sc. the relation is sometimes expressed by *be* (= by) as 'this field is bigger be that' (Jamieson s. v. BY).

c. Followed by *that*, or by *infin.* expressing a hypothetical result or consequence.

The modern idiom would often substitute *too* with the positive followed by the infinitive, for the comparative with *than*: e. g. in quot. 1611 'the bed is too short for a man to stretch himself'; in quot. 1693 'he is too modest to deny it'. Examples occur of a confusion of the two constructions, as 'too wise than that' or 'than to be'.

Gr. *τέκνον* child), f. root *tek*: *tok* to beget.

The regular modern repr. of OE. *þegn*, if the word had lived on in spoken use, would have been *thain* (cf. *fain*, *main*, *rain*), as it actually appears in some writers, chiefly northern, from 1300 to near 1600. But *thain* was in 15–16th c. Sc. written *thane* (in L. *thanus*), and this form, being used by Boece, Holinshed, and Shakspere (in Macbeth), was adopted by Selden, Spelman, and the legal antiquaries and historians of the 17th c. to represent the Anglo-Saxon *þegn*, and became the usual form in Eng. history. Recent historians, as Stubbs, Freeman, and Green, in order to distinguish the Anglo-Saxon use from the Sc. in sense 4, have revived the OE. *þegn* as THEGN, q. v.]

3. One who in Anglo-Saxon times held lands of the king or other superior by military service; originally in the fuller designation *cyninges þegn*, 'king's thane, military servant or attendant'; in later times simply *thegn*, as a term of rank, including several grades below that of an *ealdorman* or *eorl* (EARL *sb.* 2) and above that of the *ceorl* or ordinary freeman.

In this sense the name was superseded by *baron* and *knight* in the 12th c., and continued only in historical use, in which it was written *thane* in the 16th c. Recent historians have revived the OE. form as THEGN.

† 3. Kindly thought or feeling entertained towards any one for favour or services received; grateful thought, gratitude. Rarely in *pl. Obs.*

The sense of 'gratitude, kindly or loving feeling for favour or benefit' must have been developed between that of 'good will, good feeling' generally, and that of 'the expression of gratitude'. But the feeling passes so naturally into its expression that it is not easy to separate them in the quotations, except by the accompanying verbs: *to express one's thanks*, and the archaic *to con thanks*, ought to mean to express one's *feelings of gratitude*; but *to give, offer, return* or *receive thanks*, ought to mean to give or receive *the expression of gratitude*; so *to have thanks*, but this is less clear. In many instances it is impossible to say which is meant; some of the examples given here may belong to 4.

The original plural in both uses was *þá*, in ME. *þā* and Tho, q. v., surviving in Sc. and north. dial. as Thae, but superseded in literary English by Those.

The demonstrative was also used in OE. as a relative pronoun, for which see below.]

B. Signification and uses.

The pronominal use goes back to the earliest OE. The adjectival demonstrative use in OE. corresponded to that of L. *is, ea, id*, or the unqualified French *ce, cette*, and is often indistinguishable from that of the modern definite article. But by 1200 the adjectival use of *that* began also to be more definitely demonstrative (= L. *iste, ille*, F. *ce . . . là*), and to be implicitly or explicitly opposed to This (= L. *hic*, F. *ce . . . ci*). As this appears first in Ormin, it may have been due to the influence of Norse, in which the adjectival use of *þat* as a demonstrative, opposed to *þetta* 'this', is of earlier appearance.

I. Demonstrative Pronoun. Pl. † Tho (*obs.*), Those, q. v.

* *As simple demonstrative pronoun.*

1. Denoting a thing or person pointed out or present, or that has just been mentioned : cf. II. 1.

a. a thing (concrete or abstract).

Often serving instead of repetition of the name of the thing, and directing the attention back to it (thus more emphatic than *it*). Also, for emphasis, used pleonastically in apposition to the sb. ; also, in mod. use, as in quot. 1880, placed (as subj.) after the predicate sb., with ellipsis of the copula. In quot. 1905, applied to a person contemptuously spoken of as a thing or creature.

b. a person. Now noting a person actually pointed out (not one just mentioned, exc. in emphatic pleonastic use as in **a**). Chiefly as subject

of the verb *to be* in stating or asking who or what *that* (person) is. (See also 6 c.)

Colloquially used in expressions of commendation, or in mod. use of anticipatory commendation by way of persuasion or encouragement (esp. to a child).

c. a fact, act, or occurrence, or a statement or question, implied or contained in the previous sentence: often used instead of repeating a clause or phrase (cf. a).

In OE. prepositions governed other cases besides the accusative, as the dative, e. g. *æfter, ær, mid, ontemg, tó ðem*, the instrumental, e. g. *for þý, mid þý*, etc. These partly survived in early ME.; e.g. *fro þan þat* (see Fro prep. 3).

a. Of a thing, in general sense: *that thát, that which* = the thing which, what; so *that whereby, wherein, wherewith, whence*, etc.

Sometimes following the relative clause, which then begins with *what*: *that* being in this case now pleonastic and emphatic.

In earlier use the antecedent pronoun was omitted: see That *rel. pron.* 3. From the 16th c. onwards there are examples in which it is difficult to say whether the single *that* is the antecedent or the relative. Wherever it is emphatic it may be considered the demonstrative. Cf. also That *rel. pron.* 3 and 10.

II. Demonstrative Adjective. Pl. as in I.

1. The simple demonstrative used (as adjective in concord with a sb.), to indicate a thing or person either as being actually pointed out or present, or as having just been mentioned and being thus mentally pointed out. (Now distinguished from the definite article THE as being *demonstrative*, i. e. pointing out, and not merely *definitive*, i. e. distinguishing or singling out.)

The use before a possessive, as in quot. 1551, is *obs.* or *arch.*, the periphrasis with *of* (see OF 44) being now substituted for the possessive.

In *Sc.* also referring to something mentioned immediately after, where mod.Eng. uses *this*. Cf. I. 1 c, and THIS B. II. 1 b.

That (ðăt, ðət), *relative pron.* Forms: see below. [An unstressed and phonetically weakened form of THAT *dem. pron.*, used to subordinate one predication to another.

The Common Indo-Eur. had no relative pronoun, which has been developed separately in the different linguistic families. In Latin it was evolved out of the interrogative, in Teutonic chiefly out of the demonstrative. But even within the Teutonic languages the relative is differently formed (see Wright *Gothic Grammar* § 270, *Old Eng. Grammar* § 468). In mod. English it is expressed by *that*, from the demonstrative pron., and by *who* (*whom*), *which*, *what* (after L. *qui*, *quæ*, *quod*, F. *qui*, *que*, *quel*) from the interrogative pronouns. In northern dialect, ME. and mod., it is commonly expressed by AT, 'AT, rel. pron. In OE. it was expressed (1) by the simple demonstrative *se*, *séo*, *þæt*; (2) by the particle *þe*; (3) by *þe* preceded by a personal pronoun or the demonstrative. For *þe*, see *The conjunctive particle*. The use of the demonstrative as a relative appears to have come about simply by the subordination of the second of two originally consecutive sentences to the first; thus, 'he came to a river; that (or this) was broad and deep', whence 'he came to a river that was broad and deep'. In OE. it is sometimes impossible to determine whether the pronoun of the second clause is still demonstrative or has become relative. Thus the words in the OE. version of *Bæda's History*, I. xii. (1890) 52 'Hi wæron Wihtgylses suna. þæs fæder wæs Witta haten. þæs fæder wæs Wihta haten. and þæs Wihta fæder wæs Woden nemned', might be read either as short consecutive sentences, 'They were sons of Wihtgyls; *his* father [lit. *that's* father] was called Witta; *his* father was called Wihta; and this Wihta's father was named Woden'; or 'They were sons of Wihtgyls *whose* father was called Witta, *whose* father was called Wihta, and *whose* (Wihta's) father was named Woden'. Bæda's Latin has *cujus* in all three places, so that the translator apparently used *þæs* as a relative. See also Wülfing *Syntax Alfreds des Grossen* I. § 275. Now, and for a long time past, the relative *that* has been stressless, and consequently with obscure vowel; but this unstressing and obscuration came gradually, and was never represented in writing, so that in the written forms there is nothing to distinguish the relative from the demonstrative.]

A. Examples of early inflexional forms.

(The inflexional forms were, to begin with, those of the dem. pron. and definite article (see prec. and THE); but, as relative, *that* is now invariable for gender, case, and number.)

B. Signification.

The general relative pronoun, referring to any antecedent, and used without inflexion irrespective of gender, number, and case.

I. 1. Introducing a clause defining or restricting the antecedent, and thus completing its sense. (The ordinary use: referring to persons or things.)

Sometimes replaceable by *who* (of persons) or *which* (of things), but properly only in cases where no ambiguity results: cf. 2, and see WHO, WHICH, *rel.* (For ellipsis of *that*, see 10.)

E. PASCOE *Lond. of To-day* xxx. (ed. 3) 269 The Westminster Hall that we now see.. is the building of Richard II's time.

b. As obj. of a preposition, which in this case stands at the end of the relative clause (in OE. and ME. sometimes immediately before the verb): e. g. *the cup that I shall drink of* = the cup of which I shall drink; ME. *these that I have of told* = these of which I have told.

(When *whom* or *which* is substituted for *that*, the prep. precedes the relative.)

The hole that the mouse ran into. The town that he came from.

2. Introducing a clause stating something additional about the antecedent (the sense of the

principal clause being complete without the relative clause). Now only *poet.* or *rhet.*, the ordinary equivalents being *who* (obj. *whom*) of persons, and *which* of things.

But the relative clause is often merely descriptive, stating an attribute of the antecedent; or it may give the reason or a reason of the main statement, and thus be closely connected with it; the use in these cases approaches that in 1. There are thus many cases in which modern use allows either *that* or *who*, *which*, and in which poets prefer *that*. (*That* as in quot. *c* 1450 is now impossible.)

3. As subj. or obj. of the rel. clause, with ellipsis of the antecedent.

a. Of things: *thăt* = (the thing) that, that which, what. Very common down to 16th c.; now *arch.* and *poetic*, *what* being the prose form.

In later use the single *that* may become emphatic, and is then demonstrative with ellipsis of the relative: see That *dem. pron.* 7.

9. *That* followed by a poss. pron. corresponding to the antecedent (e.g. *you that your, the man that his*, OE. *þe his*, The particle 3 d) is an ancient mode of expressing the genitive of the relative = *whose*.

(The same idiom is used in many langs., e.g. Celtic, Semitic, etc.). Still common dialectally.

¶ 10. The relative is very frequently omitted by ellipsis, esp. in senses 1, 1 b (chiefly as obj. or pred., less freq. and now only in certain connexions as subj.); also in sense 7.

This (one of the commonest idioms in colloquial English, and largely found in the literary language) prob. began with the relative *þe*, The. Cf. also That *conj.* 10.

I. 1. Introducing a dependent substantive-clause, as subject, object, or other element of the principal clause, or as complement of a sb. or adj., or in apposition with a sb. therein.

The dependent clause as subject is most commonly placed after the verb and introduced by a preceding *it*, e.g. 'it is certain that he was there' = 'that he was there, is certain': see It 4 b. As object, it usually follows, e.g. 'I have heard that he was there'. (For ellipsis of *that*, see 10.)

[This use of *that* is generally held to have arisen out of the dem. pron. pointing to the clause which it introduces. Cf. (1) He once lived here: we all know *thát*; (2) *That* (now *this*) we all know: he once lived here; (3) We all know *that* (or *this*), he once lived here; (4) We all know *that* he once lived here; (5) We all know he once lived here. In 1, 2, 3 *that* is a demonstrative pronoun in apposition to the statement 'he once lived here'; in 4 it has sunk into a conjunctive particle, and like the relative pronoun has become stressless; in 5 it has disappeared, and 'he once lived here' appears as the direct object of 'we know'. After *aware, certain, conscious, suspicious, assured, informed, persuaded*, etc., *of* or some other prep. seems understood before *that*: 'I am certain of that: he once lived here'. But 'I am certain that' may have arisen as another way of saying 'I know that'; and so of the other expressions.]

Teut. and Indo-Eur.: = OFris. *thi, thiu, thet*, OS. (*se*), *th(i)e, thiu* (*the*), *that* (*the*), (MLG., MDu. *de* (*die*), *dat*, LG., Du. *de, dat*), OHG. *der* (*de*), *diu, daz* (mod. Ger. *der, die, das*), ON. *sá, sú, þat*, Goth. *sa, sō, þata*, also Gr. *ὁ, ἡ, τό*, Zend *ho, hā, tat*, Skr. *sa, sā, tat*; all the inflexional parts exc. the nom. sing. m. and f. having the stem *þa-*, Lith., Slav. *to-*, Gr. *το-*, Zend, Skr. *ta-*, Indo-Eur. *to-*, found also in L. in *tam, tum, tunc, is-te, is-tud*, etc. The nom. sing. m. and f. in OTeut., as in Skr., Zend, Gr., belong to another demonst. stem *sa-*, I.-Eur. *so-*, found also in Ir., Gael., Gaulish *so* this, L. *-se* in *ip-se*. But in OHG., OS. (in most dialects), and in late OE. (10th c. in Northumbrian, and at length everywhere) the *s-* forms were superseded by forms in *þ-* (OHG. *d-*), from the same stem as the neuter *þæt* and the oblique cases, as well as the pl. *þá*, later *þō*, THO. After the middle of the 13th c. the *s-* forms are no longer found, exc. as a belated survival (*ze* m., *zy* f.) in the Kentish dial. of the Ayenbite (1340). The only surviving reprs. of the OE. forms are *the* and *that*, Du. and LG. *de, dat*; but while LG. *dat* (besides its other uses) is still the neuter article, the Eng. *that* has ceased to be any part of the article. In the following illustration of Forms all the inflexions are illustrated, but the special history of *þæt* and *þá* pl. will be found under THAT, THO.

(The nom. fem. *sto, séo* corresponds in form not to Goth. *sō*, ON. *sú*, I.-Eur. **sā*, but to OS., OHG. *siu* 'she'. Some identify it with Skt. *syā* fem. of the 'extended' demonstrative *sya, syā, tyat*; others regard it as a special WGer. formation related to Goth. *sī* 'she'.)]

C. as Demonstrative (or *quasi*-personal) pronoun. In late OE. and early ME., when *þe* was substituted for the earlier masc. *se*, and subsequently became the general form of the definite article (see A. 1 a β and 9), it was also used for some time as demonstrative pronoun, = the (man), that, he, esp. as antecedent to a relative; thus early ME. *þe þe* or *þe þet* for OE. *se þe*, = that (man) that, he that. The fem. was *þéo þe* (for OE. *séo þe*) she that; the pl. *þá þe* those that, they that. (The neuter was commonly *þet þe* or *þette*.)

The taking of some payment from a thief to secure him from legal prosecution; either the receiving back by the owner of the stolen goods or of some compensation, or the taking of a bribe by a person who ought to have brought the thief to justice.

Nichols (1865) in *Britton*, in note to quot. 1292, suggests that the word 'originally signified the legal *bote* or composition for theft', and was then 'applied to the illegal compounding of theft, or taking money to maintain or connive at such offenders'. But all our quotations refer to illegal payment, a form of compounding a felony.

Thegn (þēin). *Hist.* A form used by some recent historians to represent the OE. *þegn* (*þegen, þēn*), THANE[1], in its sense of tenant by military service, and as a term of rank below the *ealdorman* or *eorl* and above the *ceorl*, corresponding in its various grades to the post-conquest *baron* and *knight.*

The purpose of this spelling is to distinguish the Anglo-Saxon from the Scottish use of THANE[1] (sense 4), made familiar by Shakspere.

1848 LYTTON *Harold* I. i, A Thegn forfeited his rank if he lost his lands. 1867 FREEMAN *Norm. Conq.* I. vi. 428 *note*, The signatures are no doubt those of local Thegns. 1874 STUBBS *Const. Them (ðem, ðĕm), *pers. pron.* Forms: see below. [Three types are found in ME. *α. þe3m, þeym*, a. ON. *þeim* 'to those', 'to them', dat. pl. of the demonst. *sá, sú, þat*, the plural of which also supplies that of the 3rd pers. pron. (see THEY). This came down to the 16th c. in Eng. in the form *theim*, and still exists in north. dial. and in Sc. as *thaim*. *β.* Northern Eng. *þam*, app. bef. 1300; this appears to represent *þæm*, *þám*, dat. pl. of OE. *se, séo, þæt*, pl. *þá* (see THAT, THO), found already as accus. in the Rushworth Gospels, where Lindisf. has *hía*, Ags. Gosp. *híg*, Hatton *hyo*, all in the sense 'them'. This came down in Sc. as *thame* to 16th c. *γ.* The existing form *them*, found in R. Brunne *c* 1330. This may have originated as an unstressed form (ðĕm, ðăm) of *þeim* or (?) *þam*, or it may actually have represented the OE. Anglian *þæm* of the Rushworth Gospels.

Although the form from Norse is not known before Ormin, it must have been current in the Danelaw much earlier, since it was only dative in Norse, and must have been taken into OE. as dative, and have shared in the peculiar English change by which the accusative and dative of the pronouns were levelled under the dative form. In the singular *hine, him*, instances of this change are seen in the Rushworth Gospel Gloss *c* 975 (see HIM 1d); and it is noteworthy that the same Gloss shows the use of *þæm* as acc., = *hia, hig, hyo*, as mentioned above. This use of *þæm* as pers. pron. may itself have been due to Norse influence, the OE. word being used in the same sense as the Norse *þeim*

The commoner pron. of 3rd pers. pl. obj. (dat. and acc.) in OE. and ME. was HEM, surviving colloq. and dial. as '*em*.]

Theodolite (*þĭ*ɪˈdŏlăit). Forms: 6–7 **theodelitus, 7 theodelite, -dolit, -dilit,** 8 **-dolet,** 7– **theodolite.** [Origin unknown: see Note below.] A portable surveying instrument, originally for measuring horizontal angles, and consisting essentially of a planisphere or horizontal graduated circular plate, with an alidad or index bearing sights; subsequently variously elaborated with a telescope instead of sights, a compass, level, vernier, micrometer, and other accessories, and now often with the addition of a vertical circle or arc for the measurement of angles of altitude or depression.

The original *theodelitus* of Digges was for horizontal angles only, and many quots. down to 19th c. use the name in this sense; Digges also describes a compound instrument having also a vertical semicircle for taking altitudes, but he calls that his *topographicall instrument*, restricting the name *theodelitus* to the horizontal circle.

1571 DIGGES *Pantom.* I. xxvii. H iij, The composition of the instrument called Theodelitus. [*Note.* The name, alike in the Latinized form *theodelitus* and the vernacular *theodelite* (subseq. *-dolite*), originated in England, and is not known in French and German until the 19th c. Its first user, and probable inventor, L. or T. Digges, has left no account of its composition, as to which various futile conjectures, incompatible with its early history and use, have been offered; such is the notion that it arose in some way out of *alhidada* or its corruption *athelida* occurring in Bourne's *Treasure for Travailers* 1578, which an examination of the works of Digges and Bourne, where both words occur in their proper senses, shows to be absurd. *Theodelite* has the look of a formation from Greek; can it have been (like many modern names of inventions) an unscholarly formation from *θεάομαι* 'I view' or *θεῶ* 'behold' and *ἐλλ-ός* 'visible, clear, manifest', with a meaningless termination?]

[*Note.* Gr. θεολογία meant 'an account of the gods, or of God (whether legendary or philosophical)'. Varro, following the Stoics, distinguished three kinds of *theologia*, mythical, natural (rational), and civil, the last being the knowledge of the due rites and ceremonies of religion. This threefold division is referred to also by Tertullian and St. Augustine. In Christian Greek, the vb. θεολογεῖν was used = 'to speak of as God, to attribute deity to', whence θεολογία had the specific sense of 'the ascription of a divine nature to Christ', in contrast to οἰκονομία, the doctrine of his incarnation and human nature. Another patristic Gr. use, arising out of the primary sense, was 'the account of God, or record of God's ways, as given in the Bible', whence the late Gr. and med.L. use of *theologia* for the Scriptures themselves. In the 12th c. (1121–40) Abelard applied the term to a philosophical treatment of the doctrines of the Christian religion, which, though at first strongly condemned, became current, and, in this sense, 'theologia' came to designate a department of academic study, the text-books of which were the Bible and the Sentences (from the Fathers) of Peter Lombard. Hence the earliest Eng. use. (The passage from Gower in sense 3 is derived ultimately from Aristotle's division of the theoretic forms of philosophy into μαθηματικη, φυσικη, θεολογικη, the last being what we should call metaphysics, which included his doctrine of the divine nature.)]

†**The·olony.** *Obs. rare*—[1]. [ad. med.L. *theolōneum* tax, impost, corruption of late L. *telōnium* (*-eum*), in Vulg., ad. Gr. τελώνιον toll-house, custom-house.] Payment of taxes, tolls, or imposts.
